### **Resolution 3: Patents**

This Anglican Consultative Council:

  - a. patents on medications, particularly those related to HIV/AIDS are making antiviral agents inaccessible in parts of the world where their availability is critical; and
  - b. the practice of applying for patents on genetic and biological materials means that the developing nations are finding it increasingly difficult to maintain control over their own genetic and biological resources.
2. recognising that patent rights are intended to protect legitimate commercial needs and interests, invites member churches of the Anglican Communion:

- a. to engage in advocacy within their jurisdictions and co-operation with each other to ensure that ongoing changes to patent law both at national levels, and at the level of international trade agreements (GATT - General Agreement on Tariffs and Trade / TRIPS - Trade Related Intellectual Property Rights Agreement) protect the needs and interests of vulnerable populations and of developing nations;

#### **Resolution 6: Debt Burden**

This Anglican Consultative Council notes with satisfaction that there is movement with the World Bank and the International Monetary Fund that may offer some positive relief to the most heavily indebted countries; nevertheless, in view of the fact that the debt burden continues to cripple the economies and aspirations of the developing world, reaffirms its commitment to the campaign for debt relief and for a review of the conditions imposed on debtor nations.

1. war holds the prospect of destabilising the Middle East and we will all be better served to see our national energies and resources expended in resolving the Israeli/Palestinian conflict, such that Israel finds security and peace with its neighbours and Palestinians achieve statehood;
